First Project Proposal

I believe that online professional portfolios are an effective way to casually advertise yourself when networking other professionals. It is much more flexible and has more personality than resumes typically. For photographers these are absolutely essential as well because they all ask for them while very few ask for resumes. The main part of the website is one page with the main focus being favorited photos. These photos are exemplary of the aesthetic of the photographer. After that a short About Us as well as a my favorite places to shoot to add flavor to the website. At the bottom will be my contact email so that anyone who wants to hire me can do so easily. There will also be a navbar at the top to go to more specific sections of photography, as I can't show every photo on the main page. It will also be very mobile friendly, a very high amount of time someone will go onto your website on their mobile phone as I've noticed.
